

That Coffee Shop

Seven Shots of Coffee Shop is the best and only coffee shop in the town of Berryville for the past years until about recently when a new coffee place called Neithan's Honest Coffee Shop is established.

Ashley, owner of Seven Shots of Coffee Shop, have been hearing rumors that Neithan, owner of the new shop in town, have been stealing her recipes.

Eager to verify the rumors, Ashley asked someone to find out Neithan's coffee recipes so she could compare them with her own.

Write a program that will help Ashley and her team quickly identify whether Neithan's recipes the same with those of Ashley's.

The table below will serve as reference for Ashley's recipes:

	Mocha	Java Chip	Salted Mocha Frappe
milk	3.16 oz	2.8 oz	3.05 oz
espresso	1.02 oz	1 oz	1.03 oz
coffee beans	1 tsp	0.75 tsp	1 tsp
ice	2 cups	2 cups	2 cups
salt			0.5 tsp
Sugar	1 tbsp	0.75 tbsp	0.5 tbsp
chocolate bits	0.5 tsp	1 tbsp	

Input Format (input: **coffee.in**)

Input contains Neithan's coffee recipes in the following format:

<ingredient> - <quantity> <unit>

Each recipe is separated by an empty line.

Output Format (output: **standard output**)

Output all stolen recipes from Ashley. If none are stolen, display "Neithan is honest!".

Sample Input

```
espresso - 1.02 oz
chocolate bits - 0.5 tsp
sugar - 1 tbsp
ice - 2 cups
