

[D] Shortest

Identify the shortest word/s in a text.

Input Format (input: `d. i n`)

The input contains several lines of text.

Output Format (output: `standard output`)

Output the shortest word/s found in the text. Separate each with a new line character.

Sample Input

```
I've been watching your world from afar,  
I've been trying to be where you are,  
And I've been secretly falling apart,  
I'll see.  
To me, you're strange and you're beautiful,  
You'd be so perfect with me but you just can't see,  
You turn every head but you don't see me.
```

Sample Output

```
to  
be  
me  
so
```
