[E]   Narrative Description

Write a program to construct a narrative description of students given their information.

Input Format (input: desc.in)
The first line of input is an integer indicating the number of data sets.
Each data set contains the following data:
- student's first name (assumption: one-worded names only);
- student's last name (assumption: one-worded last names only);
- middle initial;
- age;
- course (code only);
- major; and
- year level.

Output Format (output: standard output)
Narrative description using the user's information.

See sample output for formatting.

Sample Input
2

Liezl
Go
N
18
BSIT
IT
2

Ann
Cruz
L
17
BSA
Accountancy
1

Sample Output

```
You are Liezl N. Go, 18 years old taking up BSIT, major
in IT. You are in level 2.

You are Ann L. Cruz, 17 years old taking up BSA, major
in Accountancy. You are in level 1.
```
