[B]   Counter

Count the words. Count the vowels.

Input Format (input: b.in)
The input contains several lines of text.

Output Format (output: standard output)
For each line of input, output two integers -- the first indicating the number of words and the second, the total number of vowels -- separated by a single space.

Sample Input
```
sweet sUrprise!
I miss you like crazy.
i'm longing for BETTER days.
Coffee, please.
```

Sample Output
```
2 5
5 7
5 7
2 6
```
